

Package com.sun.btrace

Interface Summary	
AnyType	This interface type is used in BTrace programs to <u>tell that any reference type</u> [object or array] <u>is allowed in the place where it is used.</u>
Profiler.MBeanValueProvider	Helper interface to make <u>accessing a Profiler as an MBean type safe.</u>
Class Summary	
BTraceUtils	This class is <u>an all-in-one wrapper for BTrace DSL methods</u> 所有功能于一身的BTrace DSL方法包装器
BTraceUtils.Aggregations	
BTraceUtils.Atomic	
BTraceUtils.Collections	
BTraceUtils.Counters	
BTraceUtils.D	
BTraceUtils.Export	
BTraceUtils.Numbers	
BTraceUtils.Profiling	Profiling support.
BTraceUtils.References	
BTraceUtils.Reflective	
BTraceUtils.Speculation	
BTraceUtils.Strings	
BTraceUtils.Sys	
BTraceUtils.Sys.Env	
BTraceUtils.Sys.Memory	
BTraceUtils.Sys.VM	
BTraceUtils.Threads	Namespaced methods
BTraceUtils.Time	分析器是一个高度专业化聚合的数据采集器
Profiler	Profiler is a highly specialized aggregation-like <u>data collector</u> optimized for high-speed <u>collection of the application execution call tree data.</u> 执行调用关系树
Profiler.Record	Record <u>represents an atomic unit</u> in the application <u>execution call tree</u>
Profiler.Snapshot	Snapshot <u>is an immutable image of the current profiling data</u> collected by the Profiler It is created by calling Profiler.snapshot() method
