

# Package com.sun.btrace

Interface Summary	
Interface	Description
AnyType	表示“任何引用类型[对象或数组]”都允许 This interface type is used in BTrace programs to tell that any reference type [object or array] is allowed in the place where it is used.
Profiler.MBeanValueProvider	Helper interface to make accessing a Profiler as an MBean type safe.

Class Summary	
Class	Description
BTraceUtils	所有功能于一身的BTrace DSL方法包装器 This class is an all-in-one wrapper for BTrace DSL methods
BTraceUtils.Aggregations	
BTraceUtils.Atomic	原子类型工具类
BTraceUtils.Collections	集合工具类
BTraceUtils.Counters	
BTraceUtils.D	
BTraceUtils.Export	
BTraceUtils.Numbers	
BTraceUtils.Profiling	Profiling support. [问题或性能]分析支持！
BTraceUtils.References	
BTraceUtils.Reflective	
BTraceUtils.Speculation	
BTraceUtils.Strings	
BTraceUtils.Sys	
BTraceUtils.Sys.Env	
BTraceUtils.Sys.Memory	
BTraceUtils.Sys.VM	
BTraceUtils.Threads	Namespaced methods 命名空间的方法
BTraceUtils.Time	分析器是一个高度专业化聚合的数据采集器，专门为高速的"应用执行调用关系树"数据收集做了优化
Profiler	Profiler is a highly specialized aggregation-like data collector optimized for high-speed collection of the application execution call tree data. 记录表示"应用执行调用关系树"的一个原子单元
Profiler.Record	Record represents an atomic unit in the application execution call tree
Profiler.Snapshot	Snapshot is an immutable image of the current profiling data collected by the Profiler 镜像是由"分析器"收集的当前分析数据集的一个不可改变的影像

It is created by calling **Profiler.snapshot()** method
